Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by either Huang (4,930,264) or Courson et al. (5,609,516).

Both Huang and Courson et al. disclose all of the limitations of claim 1, i.e., a sanding pad assembly having a backing pad (lower hatching; 30 respectively); a plurality of apertures (71, 60 respectively) extending through the pad; an annular frame (5 and 6, 14 respectively)

having a circumferential side wall including first and second circumferential axially spaced edges, one of them being a lower edge of the side wall and attached to the backing pad (6, at least the corners as in Fig. 3 respectively), a back wall extending generally radially inward from the other of said edges and having an opening (the edge in 5 accommodating the bolt, rear surface of the mounting member 14 respectively).

Regarding claim 2, both Huang and Courson et al. meet the limitations, i.e., sanding disk having hole aligned with the holes in the pad (upper marking, 44 and 60).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

4. Applicant's arguments filed 11/19/04 have been fully considered but they are not persuasive.

The argument regarding Huang that it does not teach or suggest a sanding pad assembly including an annular frame having the edges wherein the lower edge is attached to the pad is not persuasive. A sanding pad assembly is met by at least 5, 6 and 7, wherein it includes a side wall (6) having lower (attached to the pad) and upper edges (the upper edge of 5, by the bolt aperture), the upper edge extends radially inward (pass the aperture) defining an opening in vacuum communication with the suction housing. Nothing in claim language excludes applying the members or elements in Huang as indicated, i.e., the unitary members 5 and 6 defining the sidewall, lower and upper edges and the back wall.
